

Position Description – Research Fellow (Postdoctoral)

Position Details

Position Title:	Research Fellow (Postdoctoral)
College/Portfolio:	STEM College
School/Group:	School of Computing Technologies
Campus Location:	Based at the Melbourne CBD campus, however, may be required to work and/or be based at other campuses of the University.
Classification:	B1
Employment Type:	Fixed Term for 3 years
Time Fraction:	1 FTE

RMIT University

RMIT is a multi-sector university of technology, design and enterprise with more than 96,000 students and close to 10,000 staff globally. The University's mission is to help shape the world through research, innovation and engagement, and to create transformative experiences for students to prepare them for life and work.

<https://www.rmit.edu.au/about>

<https://www.universitiesaustralia.edu.au/university/rmit-university/>

Our three main campuses in Melbourne are located in the heart of the City, Brunswick and Bundoora. Other locations include Point Cook, Hamilton and Bendigo, two campuses in Vietnam (Hanoi and Ho Chi Minh City) and a centre in Barcelona, Spain. RMIT is a truly global university.

<https://www.rmit.edu.au/about/our-locations-and-facilities>

We are also committed to redefining our relationship in working with, and supporting, Indigenous self-determination. Our goal is to achieve lasting transformation by maturing our values, culture, policy and structures in a way that embeds reconciliation in everything we do. We are changing our ways of knowing, working and being to support sustainable reconciliation and activate a relationship between Indigenous and non-Indigenous staff, students and community. Our three campuses in Melbourne (City, Brunswick and Bundoora campuses) are located on the unceded lands of the people of the Woi Wurrung and Boon Wurrung language groups of the eastern Kulin Nation.

Why work at RMIT University

Our people make everything at the University possible. We encourage new approaches to work and learning, stimulating change to drive positive impact. Find out more about working at RMIT University, what we stand for and why we are an Employer of Choice.

STEM College

The STEM College holds a leading position and expertise in the science, technology, engineering, mathematics, and health (STEM) fields. We are uniquely positioned to influence and partner with industry, as never before.

STEM College is a community of exceptional STEM researchers, teachers, inventors, designers and game-changers, supported by talented professional staff. We offer higher education programs across all STEM disciplines at the Bachelor, Master and PhD levels, and ensure our students experience an education that is work-aligned and life-changing.

The College is renowned for its exemplary research in many STEM areas including advanced manufacturing and design; computing technologies; health innovation and translational medicine; nano materials and devices; and sustainable systems. Our brilliant researchers attract funding from government and industry sources.

Industry is at the heart of what we do. It ensures our research has real world impact, and our students are truly work-ready. Under the leadership of DVC STEM College & Vice President, Digital Innovation, we have established new hubs of industry-connected digital innovation and endeavour and are engaging with global STEM organisations at scale.

Our diversity and shared values empower our work, and we are proud of the College's inclusive, caring culture. We offer a safe, dynamic work environment, and support every member of our community of achieve their potential. The College appointed Victoria's first ever Dean of STEM, Diversity & Inclusion in 2020, and this role drives gender equity, diversity and inclusion strategies across the College.

STEM College employs 1,000 staff who deliver onshore and offshore programs to approximately 20,000 students.

We are here to positively impact the world and create the next generation of STEM leaders.

School of Computing Technologies

The School of Computing Technologies is a centre for digital innovation, world class research, and education in STEM via streamlined collaboration across relevant disciplines.

The School is led by the Dean, School of Computing Technologies, and has three disciplines:

- Data Science
- Artificial Intelligence
- Cloud Systems and Security

Our PhD students and faculty conduct world leading research in:

- Artificial Intelligence
- Search and Recommendation
- Machine Learning
- Data Analytics

- Distributed Computing
- Cybersecurity

The strong focus on technology will drive the development of new capability platforms and enable the ability for RMIT to be embedded within industry and leading local and international research organisations.

The School's leadership is tasked with the significant responsibility of building the architecture and capability to position RMIT with a supercomputer capacity and a world class digital leading lab which will support interdisciplinary activities as they transition into augmented reality. SCT will fast-track digital innovation across all College programs and elevate our external position as a leader in technology and digital innovation.

Position Summary

The Postdoctoral Research Fellow (PDR) role is to be employed as part of the newly awarded ARC Discovery grant (that is titled "Preventing Exfiltration of Sensitive Data by Malicious Insiders or Malwares"). The Postdoctoral Research Fellow takes the major responsibility to design, implement, and test the new methods for data exfiltration, and mentoring higher degree research candidates.

Extensive publications are not needed, but a few in reputable cybersecurity venues (e.g., A* conferences/journals) are desirable

Reporting Line

Reports to:

Professor Zahir Tari
School of Computing Technologies
Research Director of the RMIT Centre of Cyber Security Research and Innovation

Organisational Accountabilities

RMIT University is committed to the health, safety and wellbeing of its staff. RMIT and its staff must comply with a range of statutory requirements, including equal opportunity, occupational health and safety, privacy and trade practice. RMIT also expects staff to comply with its policy and procedures, which relate to statutory requirements and our ways of working.

RMIT is committed to providing a safe environment for children and young people in our community. Read about our commitment and child safe practices. <https://www.rmit.edu.au/about/our-locations-and-facilities/facilities/safety-security/child-safety>.

Appointees are accountable for completing training on these matters and ensuring their knowledge and the knowledge of their staff is up to date.

Key Accountabilities

- Design, implement and test the new generation methods for data exfiltration for large computer systems and networks.
- Conduct high-quality research individually or as part of a team including: managing research projects within timelines and budget and ensuring compliance with quality and reporting requirements as required; publishing research results in high-quality outlets as required; assisting with grant writing as required; mentoring and/or supervising higher degree by research candidates as required; actively engaging with clients and external stakeholders as required.
- Actively contribute to the development of the ARC Discovery project and engagement strategy within the research team, ensuring it aligns with the strategy of the School, the STEM College, and the University.
- Participate in the College's governance activities as requested and undertake administrative duties, including engagement activity within RMIT.

Key Selection Criteria

1. Extensive research and/or industry experience in cybersecurity, preferably around malware detection.
2. Extensive experience in large-scale systems design, implementation, and testing.
3. Emerging track record and recognition for quality research outputs in the areas of cybersecurity, development of new research initiatives, competitive research funding, and industry links.
4. A strong work ethic, and the ability to work well independently, and as a member of a broader team, including with industrial partners.
5. Demonstrated ability to mentor and/or supervise higher-degree research candidates.
6. Excellent interpersonal and communications skills appropriate for interacting with higher degree by research candidates, staff and industry, together with a strong commitment to teamwork and multidisciplinary collaboration.

Qualifications

A PhD degree in Computer Science related field is required.

Note: Appointment to this position is subject to passing a Working with Children Check and other checks as required by the specific role. Maintaining a valid Working WithChildren Check is a condition of employment at RMIT.
